

Monumenta Asiae Minoris Antiqua XI

Monuments from Phrygia and Lykaonia

Monumenta Asiae Minoris Antiqua XI is a Corpus of 387 inscriptions and other ancient monuments, 292 of which are unpublished, from Phrygia and Lykaonia recorded by Sir William Calder (1881-1960) and Dr Michael Ballance (†27 July 2006) in the course of annual expeditions to Asia Minor in 1954-1957. The monuments have been edited with full commentaries and marked-up in xml using EpiDoc electronic editorial conventions by Peter Thonemann with the assistance of Édouard Chiricat and Charles Crowther. The full Corpus will be published online on 14 September 2012 at the following address:

<http://mama.csad.ox.ac.uk>.

A print volume will be published later as a Roman Society monograph. The *MAMA XI* project has been funded by a grant from the Arts and Humanities Research Council, and is based at the Centre for the Study of Ancient Documents in Oxford.

Anbararası (ancient Sidamaria, Lycaonia), 1957: funerary inscription recorded by Michael Ballance, with villagers and tools of the trade (MAMA XI 378).
